

Wisconsin Technical College System (WTCS) and Viterbo University Professional Pathways Verification Form

Professional Pathways allows opportunities for students from any technical school in Wisconsin, to build in bachelor degree requirements, which may allow a seamless pathway into the BSN Completion program at Viterbo University.

This is designed for students waiting to start nursing core courses at the technical school. Students will be eligible to apply for financial aid at Viterbo, so long as the student is not taking courses at any other institution and **has not** applied for aid elsewhere.

Students who are enrolled in nursing courses at the technical school, may also take courses at Viterbo, so long as aid is **ONLY** awarded from the technical school. Students can not apply for aid at Viterbo in this instance, and a "Consortium Agreement" must be signed.

To become enrolled in the program students must obtain approval from their Associate Dean, using this verification form.

Program Requirements

- Complete Anatomy and Physiology and either Advanced Anatomy and Physiology or Microbiology, with a minimum grade of "C" in both courses
- Complete 15 credits of general education requirements, including: Written Communication, Speech, Sociology, Psychology, & Developmental Psych, with a minimum 2.25 GPA
