Final Summer Research Report Guidelines

Summer Research Faculty Mentors are expected to create a final summer research report that explains the following:

- Impact on your research/scholarly goals
- Feedback on the experience
- Advice to future faculty who will engage in undergraduate research

Reports should be succinct (one-two pages in length). Appendices may be added but should not exceed 5 pages. Please use lay terminology that can be understood by those outside your discipline whenever possible.

Thank you in advance for completing this helpful report! Please contact Kirsten Gabriel at kkgabriel@viterbo.edu with any questions you might have.

Reports should be emailed to kkgabriel@viterbo.edu

sometime between Friday, July 10th and Friday, July 17th, 2015.
