Executive Summary

This report presents the work accomplished in Viterbo University’s academic programs in understanding, confirming, and improving student learning. It summarizes the assessment results of the academic year 2013-2014. The report tracks progress made in assessment processes and practices and summarizes the use of assessment for improvements in student learning in undergraduate programs, graduate programs, and general education.

Strengthening Learning through Assessment in Undergraduate and Graduate Programs
Of the 60 established academic programs (both undergraduate and graduate):

- All (60) have data on student learning and are in the process of analyzing the data
- 100% (60) have articulated action taken to improve student learning.
- 93% (56) have tested the effectiveness of actions, either confirming learning or taking further action.

The academic programs continue to make progress in improving student learning through assessment. The emphasis is on direct measures; indirect assessment at the program level is supplemental. The Academic Program Assessment Committee set goals for continued progress in the academic programs. These goals were shared with faculty in the Annual Program Assessment Report.

**In 2013-2014, sixty of the academic programs are considered established programs. There are several programs which were discontinued, and several new programs which are on the five-year assessment implementation cycle.**

The report presents many examples of improved learning and student achievement through assessment. One example of effective assessment is the work done by faculty in the Accounting programs: one program is delivered in a face-to-face format to traditional students and the other program is a degree-completion program delivered in a compressed hybrid format to adult learners. Faculty have aligned the curriculum, teaching methods, methods of measurement to four common learning outcomes: Communication, Problem Solving, Ethical Decision Making, and Legal and
Regulatory Environment. Although the curricular pathways are appropriately differentiated for the two different groups of students, the same outcomes are assessed and learning is confirmed following targeted adjustments for improvements. Several direct methods of measurement are common to both programs and results have led to changes in pedagogy / andragogy and to increases in student learning. On the legal and regulatory environment outcome, results led to the instructor allocating more classroom time to student analysis and discussion of text cases, by increasing student responsibility for case preparation before class, and by increasing the number of quiz questions based on comprehensive fact situations and increasing the point value of those questions compared to more straightforward analysis questions. This action resulted in a 2% increase in student scores overall, learning was confirmed, and the loop was closed.

Assessment Practice and Progress
Faculty oversight of academic program assessment is provided through the Academic Program Assessment Committee, and in 2013-14, the committee promoted the following:

- Developed and implemented the following faculty development activities: an expanded library of resources on the assessment web pages, workshops with departments on rubric development and curriculum mapping.
- Worked with the Office of Assessment and Institutional Research to host the annual Assessment Day in May 2014—with department consultations, guided work time by departments to support the collaborative work of assessment, and hosted a lunch.
- Established robust goals for assessment progress for the Sept. 2014 updates, which were met;
- Provided in-depth formative peer review on assessment work for the 13 academic programs a year before program review;

Assessing the LIVE Outcomes-based Core Curriculum
Assessment work in 2013-2014 encompassed seven of the eight LIVE learning outcomes. The common assignments in all four mission seminars were assessed in May and June 2014, with faculty and staff teams evaluating learning outcomes in a stratified random selection of assignments.

Following four years of targeted changes based on the assessment results, the criteria for outcomes measured in Franciscan Values and Traditions were all met. The continuous improvement stemming from assessment has included: targeted changes in the assessment methods and measurements, such as finer alignment between outcomes, assignments, rubrics, and guidelines; changes in the common text based on assessment results; refinement of the structure and curricular design of the mission seminars.

2013-2014 Core Curriculum assessment measured the following LIVE outcomes:

- Social Justice
- Ethical Reasoning & Moral Development
- Intercultural Knowledge & Action
- Integrative Learning
- Critical Thinking
- Information Literacy
- Written Communication

**In 2013-2014, sixty of the academic programs are considered established programs. There are several programs which were discontinued, and several new programs which are on the five-year assessment implementation cycle.**
Minimum Expectations for Establishing Assessment in New Programs:

New programs will establish learning outcomes and a curriculum map along with program design. The deans’ council will determine what year is the first full year of a program, to give programs that are launched in stages a reasonable time frame. Programs with few majors (10 or fewer) may take longer to determine curricular changes.

End of Year 1: Establish a plan: outcomes aligned with teaching strategies and methods.

End of Year 2: Collect actionable data, test validity of assessment tools and processes, and draw conclusions through analysis.

End of Year 3: Collect actionable data, test validity of assessment tools and processes, and draw conclusions through analysis.

End of Year 4: Take action to improve student learning and/or take action to improve assessment.

End of Year 5: Test the effectiveness of actions, either confirming learning or taking further action. Now the program is counted as an established program.

2014 Academic Program Assessment Summaries

Name of Assessment Coordinator: Sherri Lisota
Name of Program: Art
Date: September 26, 2014

1. Assessment Results from 2013-2014

The 2013-2014 data reflects that 80% or more of students in art programs are meeting sophomore level proficiency in six of the six outcomes. The four-level rubric for measuring outcome two was refined. Information from appropriate major courses was compared across grade levels. We wrote curriculum maps for three Art programs: the BA in Studio Art; the BFA in Art; and the BA in Art Education. We identified Art courses that meet general education outcomes in reading, writing, researching, and oral communication skills at level II.
In 2014-2015 we hope to focus on collecting more information and refining the rubrics for student assessment of outcome two and revise the language of outcome six having to do with professional understanding, attitudes and dispositions.

Name of Assessment Coordinator: Arts Administration Advisory Board
Name of Program: Arts Administration
Date: October 2, 2014

1. Assessment Results from 2013-2014
In 2013-14, the Arts Administration Advisory Board was mobilized to work on assessment; the Advisory Board met on May 15, 2014 and on Sept. 26, 2014. The board revised learning outcomes and created a curriculum map, identifying specific assignments in which students demonstrate the learning outcomes. The group decided on the criteria, gathered assignment sheets, rubrics, and results for five assignments from AADM 340 and AADM 400. Faculty analyzed the results and decided on actions, one of which is to identify an assignment in AADM 300 that measures Advocacy.

In Fall 2014: Michael Ranscht will work with adjunct faculty on revising rubrics. Michael Ranscht will communicate with adjunct faculty about collecting results for specific assignments in courses taught in FA14 and SP15; the advisory board will work to complete the outcomes statements. The advisory board will explore the concept of having a specific AADM Freshman and Sophomore Evaluation with a rubric aligned with AADM outcomes, along with the possibility of articulating entrance requirements to the program. The advisory board will identify assessment methods in AADM 200, AADM 300, and in AADM 287/487. In Spring 2015, the advisory board will meet to analyze results and draw conclusions.

Name of Assessment Coordinator: Mary Ellen Haupert
Name of Program: Music
Date: October 2, 2014

1. Assessment Results from 2013-2014
The music department developed project/paper assignments for MUSC 327/328 to meet the GEN ED requirements for ORAL COMMUNICATION and WRITTEN COMMUNICATION, respectively. Rubrics were designed to meet AAC&U criteria, as well as meeting course/department outcomes for Music History. The 2013-2014 was the first series of MUSC 327/328 courses that fulfilled these requirements, providing a baseline for comparison. The Music Department will work with Nicole on refining rubrics for 2014-2015. The data for most other areas (pedagogy and performance) remain strong, with significant improvement in Piano Proficiency from Fall 2013-Spring 2014. It is uncertain whether or not the changes in piano proficiency requirements helped improve these scores.

The department will continue to collect data to track performance skills, pedagogy, and music education.

- Data from the rubrics for MUSC 327/328 ORAL COMMUNICATION and WRITTEN COMMUNICATION will be compared/contrasted for further evaluation of content, methodology, and performance.
- Our current search for a permanent faculty pianist will undoubtedly provide an impetus for developing program outcomes in piano performance and pedagogy. Upper division courses such as Keyboard Literature, Piano Pedagogy, Accompanying, and the Harpsichord Seminar will be evaluated for content and/or credit hours in the overall degree plan.
- Piano Proficiency exams will be offered every four weeks of each semester (2014-2015), both to motivate and/or to allow for more than one try at passing the exam. The changes made to piano proficiency requirements in 2013-2014 will continue to be used in 2014-2015, leaving a window open for further evaluation by a new faculty hire.

Name of Assessment Coordinator: Jeff Stolz
Name of Program: Bachelor of Fine Arts in Theatre- core
Date: September 29, 2014

1. Assessment Results from 2013-2014

Last year we focused on streamlining the Freshman/Sophomore evaluation process. We chose to focus on two of the outcomes assessed by the evaluation: Outcome 2. Understanding the development of the art of theatre practice; and 3. Transferring skills to work. The evaluation form has specific questions targeting and measuring these outcomes. The average for each outcome was 3.5 out of a possible score of 5. This is an average of 70% for each outcome, which falls short of our goal of 80%. The primary conclusion drawn is that we need a new evaluation form/system. Not to skew the numbers in our favor, but to make it clear as to what we mean by each question, both for students and the faculty evaluator. The physical evidence of our students work bespeaks higher than 70%. We are also reevaluating our curriculum with these outcomes in mind.

Our primary focus for assessment work for the 14-15 academic year is to continue to streamline our evaluations so that the language is clear and making them digital so that the data is manageable. The Institutional Research office was a great help in making the information from last year’s evaluations manageable, creating something that we will be able to maintain and refer to year by year. We will be looking at the same outcomes, but with a broader lens. We will be using our new digital format for both the upcoming portfolio review and the freshman and sophomore evaluations. The new, more manageable format, will enable us see what we have been doing and to improve the student’s learning in the future.

Name of Assessment Coordinator: Frank Ludwig
Name of Program: Design and Technical Production
Date: September 27, 2014
1. Assessment Results from 2013-2014

We are continuing to record assessment data for all six program outcomes each year. Last year we investigated whether it would be possible to add an assessment instrument for the “Text Analysis” program outcome in the sophomore evaluation at the department level. This did not turn out to be practical so we will look at the portfolio review procedure again to see if it can be added there. We only have one active measure for that outcome. All other outcomes seem to be adequately measured. We will also look at our goals and thresholds. We believe that we may need to raise our targets as we are easily meeting current thresholds in all outcomes.

We will look at the “portfolio review” procedure again to see if a measure for “Text Analysis” can be added there. We only have one currently active measure for its related outcome. All other outcomes seem to be adequately measured. We will also look at our goals and thresholds. We believe that we may need to raise our targets as we are easily meeting current thresholds in all outcomes.

Name of Assessment Coordinator: Michael Smuksta
Name of Program: Broad Field Social Studies
Date: September 12, 2014

1. Assessment Results from 2013-2014

The senior BFSS majors were a mixed group in abilities. Criteria were not met due to several reasons. One student with personal health and family issues experienced failure in History 465 by not completing the assignments although the instructor worked with the student as much as possible via extensions. Another student simply did not complete assignments in History 465, and subsequently did not register for spring 2014 classes. Finally, a third student who had a history of underachievement in previous BFSS coursework (GPA of 2.0) earned a CD on the research paper because the paper did not meet the minimum required length of 25 pages.

On more positive notes, one student nicely revised the mid-way written assessment with feedback from department members and the three April Scholar’s Day oral presentations met the criteria for Historical Sources and Historical Interpretation.

The capstone courses are not offered in 2014-2015, so attention will focus on the introductory and mid-way interviews, as well as recruitment of new majors. Two transfer students registered as BFSS majors in May, 2014. The department will work closely with the Admission counselors. The department contacted area high school principals regarding attendance of high school students at the annual Constitution Day commemoration on September 17, 2014, but responses were poor. Also, only one area school accepted an offer for a member of the history department to teach an AP class as a guest instructor to provide visibility to our program to area students. The details need to be worked out. The department will also explore common capstone courses for students, especially with Religious Studies. English and Liberal Studies are reluctant to combine the capstone for reasons specific to their programs, but their low numbers of majors may require a reassessment of those positions.
Finally, in response to a request of the Undergraduate Program Review Committee, the department will begin a review of the BFSS major to offer choices in subject area licensure in an effort to reduce the number of credits for the major.

Name of Assessment Coordinator: Michael Smuksta  
Name of Program: History  
Date: September 12, 2014

1. Assessment Results from 2013-2014

The assignments and assessment plan for history continue to work well in the introductory and capstone classes chosen for assessment. The senior history majors in 2013-2014 (N=3) were a particularly strong group in the two semester sequence capstones, History 465 and History 466, as their research proposals, oral presentations, and final research papers demonstrated proficiency in the four outcomes assessed: Historical Change, Historical Context, Historical Sources, and Historical Interpretation. One important change implemented was to increase the length of the research paper to a minimum of 25 pages. Students presented at the April Scholar’s Day, and one student presented at a UW-Platteville conference, “People and the Land.”

The capstone courses are not offered in 2014-2015, so attention will focus on the introductory and midway interviews, as well as recruitment of new majors. The department will work closely with the Admission counselors and the Humanities recruitment coordinator. The inaugural Humanities Scholarship Competition in February 2014 netted one new history major. A Trustees Opportunity Grant was submitted for increased funding for the event, in combination with the social sciences in February 2015. The department contacted area high school principals regarding attendance of high school students at the annual Constitution Day commemoration on September 17, 2014, but responses were poor. Also, only one area school accepted an offer for a member of the history department to teach an AP class as a guest instructor to provide visibility to our program to area students. The details need to be worked out. The department will also explore common capstone courses for students in the humanities, especially with Religious Studies. English and Liberal Studies are reluctant to combine the capstone for reasons specific to their programs, but their low numbers of majors may require a reassessment of those positions.

Name of Assessment Coordinator: Jesús E Jambrina  
Name of Program: Latin American Studies (minor)  
Date: September 30, 2014

1. Assessment Results from 2013-2014

Students met criteria of choosing cultural categories, but they could do a better job on the application part of them in the related Midterm question.

Next time I teach this course I will be more specific on my expectation for the assignment. I expect to teach again in Spring 2016.

***************

Name of Assessment Coordinator: Vickie Holtz-Wodzak
Name of Program: Liberal Studies
Date: September 30, 2014

1. Assessment Results from 2013-2014

1. The capstone course (LBST 499) seems to be doing the job it was designed for. All of the students met or exceeded criteria. Informally, it’s clear that they would benefit from more time to develop interdisciplinary research skills, so we are pleased that we can now offer LBST 399 the preceding semester.
2. LBST/English 212 serves as the beginning assessment level for 2 of the 3 criteria for the major. It is a new course. The assessment assignment used the first time the course ran encouraged students to demonstrate the ability to use 2 disciplinary lenses to discuss a problem, but it was not sufficiently focused to allow us to separate out the assessment criteria. Conclusion: the course should work, but the assignment needs redesign.
3. English/RLST 486 is an intentionally designed interdisciplinary course being used as a substitute for LBST 3xx, which we will likely never run due to enrollment concerns. The assessment assignment is still under consideration. There are 3 LBST students in the class.

1. To refine the assessment mechanism for LBST/ENGL 212 to properly measure the assessment criteria.
2. To refine the assessment mechanism for the designated interdisciplinary 300 level course to properly measure the assessment criteria.

***************

Name of Assessment Coordinator: Michael Lopez-Kaley
Name of Program: Religious Studies
Date: September 30, 2014

1. Assessment Results from 2013-2014

This past year, we focused on the continuing assessment of the RLST 160 course, which is the gateway course to all RLST courses, and required by the Gen Ed curriculum. The number of students who achieved satisfactory scores on the post-test, indicating a knowledge of four outcomes, was 94%. We will continue to proceed in this course as is. RLST 465 was newly assessed this year, and both minors and majors performed satisfactorily in a second analysis paper that tested for three outcomes. This course is offered every other year. RLST 481, capstone, testing for an overall knowledge of Religious Studies material, showed that the students applied solid research methods and was successful.

In 2014-2015, we will be assessing, especially, outcomes regarding the Franciscan Tradition. In RLST 160, we will be focusing on assessing which areas of Theology students are struggling with, based on specific questions missed on the post-test. This will give direction to ways we can supplement those units during the school year. We have one major graduating in May, and so will continue to refine RLST 481. We will also be going through a curriculum review this year, so will be revising our courses and which outcomes apply to each course.

******************************************************************************

Name of Assessment Coordinator: Maribel V Bird
Name of Program: Spanish
Date: September 5, 2014

1. Assessment Results from 2013-2014

Last year we focused on two of eight outcomes. SPAN 405 was evaluated for effectiveness in oral communication. A new activity was included for this course since the current faculty member teaching the course has yet to be trained in OPI testing which was the tool of choice in the past. The new activity proved to be very effective since it utilized a variety of contexts and conditions that represented actual cultural and historical events. The students were asked to work in pairs and perform roles under the conditions described above. Besides language proficiency the students were able to demonstrate critical thinking skills and cultural specific situations. All students performed as expected. An embedded course assignment was utilized for literary analysis. Using a rubric for literary analysis the students had to show understanding and mastery of the literary process and critical thinking skills. While some students still struggle with critical views in literary analyses, the majority is becoming bolder in their views of literature as a message envoy.

For 2014-2015, we will be evaluating students’ abilities in analyzing main issues in Spanish-speaking countries in the light of their cultures, politics, economy, and history and their skills in translating texts. Even though this is the plan as it was first established, we realize that some of our learning objectives should be streamline. While still working on our current target objectives, this year we plan to dedicate time to consult with our advisors in how to simplify our current learning objectives or perhaps narrow expectations to specific issues. For example, we could improve oral proficiency, grammar issues and other concerns such as ethics in translation by using specific tools and activities.

******************************************************************************

Name of Assessment Coordinator: S. Lucy Slinger
Name of Program: Sustainability
Date: September 30, 2014

1. Assessment Results from 2013-2014

The first student graduated with a BS degree in sustainability May 2014. Work has been done to establish key criteria for assessment of the program. This involves a pre-program assessment for students in the foundational core course SUST 210 and post-program course completion assessment
using the same instrument as a part of the capstone SUST 495 program. From the initial assessments it appears that students are meeting the middle levels or above for all criteria. Two assessment methods were reported on for each of the five outcomes. A major accomplishment has been the identification of a core group of faculty to teach the degree program courses given the School of Business decision to drop their Sustainable Business degree and hence no longer provide course coverage for 4 of the 8 core courses.

Assessment work goals for 2014-2015, we will work on the alignment of program criteria and the pre – post assessment instrument developed. This will be a transition year for the program as degree numbers have not met anticipated target levels. There will be 3 students graduating in 2014 -15 academic year to enable more detailed assessment of the program evaluation criteria. The current part-time faculty member coordinating the program will retire at the conclusion of this academic year. Pending administrative decisions to continue the program or not faculty time will be used to refine the program assessment.

Dates are based on information entered into TracDat as of Fall 2014

2014 Academic Program Assessment Summaries

Name of Assessment Coordinator: Sara Cook
Name of Program: Accounting
Date: September 28, 2014

1. Assessment Results from 2013-2014

In fall 2013, a new fulltime accounting faculty (Tim Szmanda) was hired, and our new group of accounting faculty met with the assessment coordinator to evaluate and draft a new assessment plan. In spring 2014, accounting faculty gathered again to discuss the current assessment plan and results to determine whether the conclusions drawn from the data matched their intuition on student performance. We again evaluated the methods to ensure they were the most authentic measures of student learning on each outcome. Subsequently, the accounting assessment plan was revised to capitalize on a new comprehensive project in the auditing course, which is required for all accounting students and taught by a fulltime faculty member. Descriptions and rubrics for the new assessment methods were added to TracDat, and data was collected on a total of four methods across three of the four student learning outcomes. The students are failing to meet the benchmarks on the outcome pertaining to ethical decision making, and the intervention proposed last year improved scores slightly, and further interventions are proposed for this year. Data collected confirmed student learning in the newly designed auditing (capstone) course.

In 2014-2015, we will collect results on three of the four student learning outcomes. One of our senior accounting faculty is retiring from Viterbo, so we will have a new hire to bring on board with the assessment plan who may also bring new ideas and directions to the accounting curriculum. Our 2014-2015 assessment data will shed light on the performance of the substantially increased number of international students in the accounting program; interventions to improve ESL student learning are anticipated. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness.

Name of Assessment Coordinator: Sara Cook
Name of Program: Accounting Degree Completion
Date: September 28, 2014

1. Assessment Results from 2013-2014

Data was collected on three of the four student learning outcomes for the accounting degree completion program in 2013-2014: communication, ethical decision making, and legal and regulatory environment. Students met the benchmark criteria on only one of the three outcomes assessed this year. The accounting degree completion program faculty will meet in fall 2014 to discuss these results and recommend changes to the curriculum and specific courses. So far, actions have been identified for the legal and regulatory environment outcome.

In 2014-2015, we will collect data on all four student learning outcomes for the program. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness. The recent addition of a CAL program coordinator necessitates a discussion regarding best practice for collecting, entering, and analyzing the assessment data for CAL programs.

Name of Assessment Coordinator: Sara Cook
Name of Program: Health Care Management
Date: September 28, 2014

1. Assessment Results from 2013-2014

The health care management program is in its third year. Data was collected on three student learning outcomes in 2013-2014: health care industry/environment, group behavior and teamwork, and management and leadership. Students met the criteria in all of the six direct methods in both face to face and online courses utilized to assess the student learning outcomes. The assessment plan dictates that data is collected on three year cycles, and one of the measures this year was the third in the three year cycle. Subsequently, analysis of the combined data on the group behavior and teamwork outcome through the OMGT 304 measure confirmed student learning in this area.

In 2014-2015, per the HMGT assessment rotation, we will collect data on three of the six student learning outcomes (health care industry environment, group behavior and teamwork, and communication). Curricular changes (removing OMGT 304 as a requirement and moving content into OMGT 306) necessitates a revision of two assessment methods. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness. The recent addition of a CAL program coordinator necessitates a discussion regarding best practice for collecting, entering, and analyzing the assessment data for CAL programs.

Name of Assessment Coordinator: Sara Cook
Name of Program: Management & Leadership
Date: September 28, 2014

1. Assessment Results from 2013-2014

In 2013-2014, all Dahl School of Business faculty gathered to discuss the current assessment plan and results to determine whether the conclusions drawn from the data matched their intuition on student performance. We also discussed whether the methods were the most authentic measures of student learning on each outcome. Subsequently, the MGTL assessment plan was revised to eliminate methods from the MGMT 448 course (which has been removed from the professional core of all of our business programs) and identify methods in a newly designed MGMT 474 Systems Thinking and Leadership seminar course. Data were collected on four of the five student learning outcomes: Ethical Decision Making, Complex Business Issues, Communication, and Business Functional Areas. One loop was closed, and a new action was recommended on the Communication outcome. Faculty feedback during the assessment discussion points to a desire to implement a foundational simulation as an individual project as an alternative to the capstone simulation in MGMT 449.

In 2014-2015 we will continue to assess communication; endless interventions have resulted in small increases in student learning in this area. Turnover among key faculty in the business common professional core courses used for assessment have impacted the cycle of assessment, and our MGTL assessment plan will be reviewed again in the coming year by our faculty including the new hires. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness.

Name of Assessment Coordinator: Sara Cook
Name of Program: Management Information Systems (INFO) Online
Date: September 28, 2014

1. Assessment Results from 2013-2014

Eight direct assessment methods were utilized to collect data on three of the student learning outcomes of this program in 2013-2014: Managing Information Technology, Group Behavior and Teamwork, and
Computing Skills. Where criteria were not met, instructors identified that some students had stopped participating in class despite attempts by the instructor to reach out directly and through the advisor. Data collected on the managing IT outcome and the computing skills outcome were in the third year of collection, so analysis was completed. Student learning was confirmed on all assessed outcomes.

In 2014-2015, per the INFO assessment rotation, we will collect data on three of the six student learning outcomes (managing IT, group behavior and teamwork, and communication). Curricular changes (removing OMGT 304 as a requirement and moving content into OMGT 306) necessitates a revision of one assessment method on the teamwork outcome. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness. The recent addition of a CAL program coordinator necessitates a discussion regarding best practice for collecting, entering, and analyzing the assessment data for CAL programs.

Name of Assessment Coordinator: Sara Cook
Name of Program: Marketing
Date: September 26, 2014

1. Assessment Results from 2013-2014

In 2013-2014, marketing faculty met to discuss the current assessment plan and results to determine whether the conclusions drawn from the data matched their intuition on student performance. We evaluated the methods to ensure they were the most authentic measures of student learning on each outcome. Subsequently, the marketing assessment plan was revised to incorporate more upper division marketing courses and reduce the number of methods in MKTG 351, which is a foundational course for the marketing program. Data was collected on all five student learning outcomes for the program. Though students continue to miss the benchmark on the ethics outcome, it appears that the failure has more to do with lack of participation rather than lack of understanding. Actions to improve learning were suggested on a new method in the MKTG 353 Marketing Research course.

In 2014-2015, we will again collect results on five student learning outcomes, with follow up on the MKTG 353 intervention and a focus on the ethics and communication outcomes. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness.

Name of Assessment Coordinator: Sara Cook
Name of Program: Master of Business Administration
Date: September 28, 2014

1. Assessment Results from 2013-2014
In 2013-2014, MBA faculty gathered to discuss the current assessment plan and results to determine whether the conclusions drawn from the data matched their intuition on student performance. We also discussed whether the methods were the most authentic measures of student learning on each outcome, especially given that the student learning outcomes were revised last year, so this was the first full cycle of assessment on the new learning outcomes with a new MBA core curriculum. The MBA assessment plan was revised to incorporate methods from a wider range of core courses. Data was collected on three of the four student learning outcomes. Interventions continue to be made on the leadership outcome in the leadership course, especially regarding the ability of ESL students to analyze a case study through a theoretical lens. A loop was closed in this area, but other interventions are now suggested through that method as well as the case study analysis in the change management course for the sustainable business strategy outcome.

In 2014-2015, we will collect data on all four student learning outcomes. We have two new MBA faculty and a line open for a third hire, so the assessment plan and curriculum will continue to be refined by our new team. A specific focus of assessment in 2014-2015 will be results drawn from the capstone projects; this year an action was taken on the capstone method for the communication outcome, and major changes have been made on the capstone process and presentation format for 2014-2015. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness.

***************

Name of Assessment Coordinator: Sara Cook  
Name of Program: Organizational Management  
Date: September 28, 2014

1. Assessment Results from 2013-2014

Data was collected on three student learning outcomes for the organizational management program in 2013-2014: human resource management, group behavior and teamwork, and management skills. Direct measures for the human resource management SLO and the management skills SLO were in their third year of data collection so were also analyzed. Students met the criteria on all collection points for the human resource management outcome over the three year cycle, and the criteria were met on two of the three collection points for the management skills outcome. Subsequently, analysis of the combined data on the two outcomes confirmed student learning.

In 2014-2015, per the OMGT assessment rotation, we will again collect data on three of the six student learning outcomes (human resource management, group behavior and teamwork, communication). Curricular changes (removing OMGT 304 as a requirement and moving content into OMGT 306) necessitates a revision of one assessment method. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness. The recent addition of a CAL program coordinator necessitates a discussion regarding best practice for collecting, entering, and analyzing the assessment data for CAL programs.

***************
Name of Assessment Coordinator: Sara Cook
Name of Program: Organizational Management Online
Date: September 28, 2014

1. Assessment Results from 2013-2014

Data was collected on three student learning outcomes for the online organizational management program in 2013-2014: human resource management, group behavior and teamwork, and management skills. Measures for the human resource management SLO and the management skills SLO were in their second year of data collection; next year these outcomes will have enough data to be analyzed per the rotation schedule. Criterion were met in all instances in for the past two years, confirming student learning out these outcomes.

In 2014-2015, we will again collect data on three of the six student learning outcomes. Curricular changes (removing OMGT 304 as a requirement and moving content into OMGT 306) necessitates a revision of one assessment method. A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness. The recent addition of a CAL program coordinator necessitates a discussion regarding best practice for collecting, entering, and analyzing the assessment data for CAL programs.

Name of Assessment Coordinator: Sara Cook & David Waters
Name of Program: Sport Management & Leadership
Date: August 8, 2014

1. Assessment Results from 2013-2014

SPML is a program in its fifth year, and in 2013-2014 we collected data on five of the six student learning outcomes. We have now settled into the assessment plan; student learning outcomes are still relevant, and methods have evolved to authentically measure learning. Though students have consistently met benchmark criteria, instructors have added many actions for continuous improvement. This year, two loops were closed and new actions recommended on more than one learning outcome. For example, the SPML 320 course was revised due to program curriculum changes (reducing total credits required in the major), and the revised course incorporated a leader interview off site. Data collected on this method showed evidence of student learning as a result of this action.

In SPML 320, sport leader interview assignment results were excellent, as well as insightful processing by students for lessons learned. SPML 330 and SPML 455 courses invited community sport leaders for interaction during strategic marketing and final semester-long-project presentations. This helped to ensure relevance for the students as to their work on the sport projects and informed sport personnel of the competency of our undergraduates. Research in SPSL 220 exceeded % and extremely pleased with oral presenting (e.g., slides and verbal component). SPML 455 did not change to individual strategic marketing plans as suggested; however, the groups did create marketing for local products or events – for which the involved local agencies were pleased.

In 2014-2015, we will again collect results on five student learning outcomes on this relatively new program. Curricular changes implemented in 2012-2013 necessitated a revised assessment plan, and the plan worked well for 2013-2014. In 2014-2015 we will collect data on the remaining outcome (not assessed in 2013-2014). A Dahl School of Business goal for 2014-2015 is to re-imagine and implement the assessment process in the school to increase efficiency while also maintaining authenticity and effectiveness.

It is suggested that a job shadow for majors in the program be facilitated early in the program, such as in the SPML 320 course. The “Hero or Goat” research could also have a verbal, graded portion to ensure the student adequately verbalizes ethical and social responsibility components required of sport leaders. For the next round of assessment, it is expected that more data be gleaned from capstone SPML 490 course to reveal senior status results. This past round of data reported more from the aspect of novice or developing proficiencies. We will continue to refine assignments as directed to achievement of student learning outcomes. Without a large faculty presence in the direct courses of this program, we would like to obtain internal (campus) and external examination of our Sport Management and Leadership Program. This might help to provide direction as to current course planning and decision making of the relatively few faculty who teach in the SPML program to-date.

Name of Assessment Coordinator: Jeff Nyseth
Name of Program: Communication Studies
Date: September 30, 2014

1. Assessment Results from 2013-2014

A goal from the previous year was to address the deficiency in their research abilities, primarily in abstracting material and applying it. In comparing data in an embedded course assignment dealing with these outcomes, we found that in 2012 students scored 7.37/10 and in 2013 they scored 7.92/10. A marginal improvement. This outcome, then, was not met. Data for this year is pending.

We analyzed data on an embedded course assignment under the Knowledge and Application of Communication Theories outcome. Our goal was to have 80% of the students engaging in this assignment score 80% or higher. Our results show that in 2012 students scored an average of 58%. In the fall of 2013 students scored an 82% composite score. The spring class scored 92.3% and students from 2014 had a composite score of 71.2%. Several students in each of the classes (except for spring 2013) did not complete the assignment, so that is affecting the results negatively. Technically this outcome was not met.

We intend to address the first deficiency regarding student research by introducing this skill earlier in their careers, preferably as sophomores. This will ensure that they are familiar with the procedure when the time comes to utilize this as an enabling assignment for upper division assessment methods such as the Evaluate Theory assignment in COMM 205, the final project and presentation in COMM 211 and the campaign strategy assignment for COMM 316.

Several assessment methods have been inactivated as a result of the continual reorganization of the department. New methods will have to be identified and implemented and entered into TracDat.

Work continues on integrating experiences in COMM 460. Comm Studies numbers are down so it makes it difficult to do the course on more than an as needed basis.

Our focus this year will be on the understand opportunities in the field of communication and understand and use technology. These two outcomes naturally go together. We are pursuing logical relationships with other programs in the College of Business and Leadership that will result in increased opportunities for collaboration, resulting in artifacts and projects that require that students utilize current technology and will open doors for greater understanding of jobs in the field. We have several assessment methods that we will be able to utilize for assessment that include utilization of conceptual and technical skills that can benefit the college and the community.

We will revisit the outcome above dealing with the students’ ability to do abstracts and effectively use primary research in the lower division classes. We will gather data on several other assignments and compare that to what we currently are using as an assessment method.

Name of Assessment Coordinator: Matthew Bersagel Braley
Name of Program: Master of Arts in Servant Leadership
Date: September 29, 2014

1. Assessment Results from 2013-2014

Our efforts to revise the culminating scholarship project (i.e., colloquium) over the past two years have produced ambivalent results. Students have demonstrated significant improvement in their ability to produce written research at the graduate level- one of the points of emphasis in our assessment last year. This improvement correlates with earlier exposure to peer-reviewed literature and increased opportunities in core courses to practice and get feedback on the style of academic writing assessed in the colloquium project. Oral communication of this culminating scholarship, however, has not improved. Though changes were made to include more feedback on presentation drafts during the capstone course, we have not embedded opportunities for students to develop research presentation skills in prior coursework. At the same time, the current emphasis on presenting a particular style of social science research has crowded out one of the primary strengths of our program – an opportunity to integrate the student’s sense of calling to servant leadership and reflection on how that calling is operationalized in the particular contexts in which they serve and lead. Addressing the growing gap between the formational aspects of the program and research outcomes is an urgent task and will have a direct impact on the assessment methods and criteria we have been employing the past three years.

Enrollment remains steady, though we are seeing an increasing number of students from beyond the tristate region (WI, MN, IA). One result of this is demand for online courses has increased. Though it is too early to tell, we are monitoring the impact of online courses on time to degree, and thus, on how we interpret enrollment numbers. For example, maintaining steady enrollment may actually mean an increase in number students graduating over a 5-year period since students are moving more quickly through the program.

In 2014-2015 we will focus again on formation of servant leaders. Specifically, we are implementing in Fall 2014 an “exit” paper on vocation / formation as part of the colloquium paper and presentation. This will give students an opportunity to articulate their development as servant leaders in relation to their research and coursework. It will also offer a way for the program to understand the impact of the program on student formation. For example, we will be able to compare personal statements submitted as part of the application to the “exit” reflections. (See new assessment method under Outcome I: Servant Leadership Theory and Practice.)

### 2014 Academic Program Assessment Summaries

**Name of Assessment Coordinator:** Norene Bunt  
**Name of Program:** IA Early Childhood Education Endorsement (106)  
**Date:** September 22, 2014
1. Assessment Results from 2013-2014

The Iowa Center is consistently administering end of program completer surveys and systematically requiring capstone portfolios from endorsement completers. Both of these assessment tools are analyzed using the prescribed rubrics.

In reviewing the 2013-2014 early childhood portfolios and end of program completers’ surveys, there is strong evidence that the early childhood program prepares our students well in the NAEYC standards overall. Students’ portfolios are well-developed and clearly provide evidence of proficiency in the standards. There was one specific area indicated for continuous improvement in two of the Standards. These areas include “hiring and supporting teaching staff” and “ongoing systematic, formal and informal assessment techniques”.

The area of “hiring and supporting teaching staff” will be addressed more in depth during the course: Organization and Administration of Early Childhood Program. The area of “ongoing, systematic formal and informal assessment techniques” will be a focus in Early Childhood Curriculum I and II.

End of program surveys and capstone portfolios for completers will continue to be administered on a regular basis and data will be analyzed to monitor progress in these identified areas. Data will be shared with the Iowa Adjunct committee and recommendations will be made for continuous improvement in these areas, as well as in the other NAEYC Standards.

Name of Assessment Coordinator: Norene Bunt
Name of Program: IA Middle School Endorsement (182)
Date: September 22, 2014

1. Assessment Results from 2013-2014

The Iowa Center is consistently administering end of program completer surveys and systematically requiring capstone portfolios from endorsement completers. Both of these assessment tools are analyzed using the prescribed rubrics.

In reviewing the 2013-2014 middle school completers’ portfolios and the middle school end of program completers’ surveys, there is strong evidence that the middle school program prepares our students well in the NMSA standards overall. Students’ portfolios are well-developed and clearly provide evidence of proficiency in the standards. There was one specific area indicated for continuous improvement based on the end of program surveys: “formative and summative assessment and adjusting instruction.”

The area of “formative and summative assessment and adjusting instruction” will be addressed more in depth during the course: Models for Teaching Middle School.

End of program surveys and capstone portfolios will continue to be administered on a regular basis and data will be analyzed to monitor progress in this identified area. Data will be shared with the Iowa
Adjunct committee and recommendations will be made for continuous improvement in this area, as well as in all of the NMSA Standards.

Name of Assessment Coordinator: Norene Bunt
Name of Program: IA PK-12 Principal/ Supervisor of Special Education Licensure (189)
Date: September 22, 2014

1. Assessment Results from 2013-2014

The Iowa Center is consistently administering end of program completer surveys, completer employer surveys, 1 and 3 year follow up surveys, and systematically requiring capstone portfolios from Educational Leadership program completers. These assessment tools are analyzed using the prescribed rubrics.

In reviewing the 2013-2014 End of Program completer surveys, surveys completed by program completers’ employers, and the 1 and 3 year Follow-Up Surveys of program completers’, the data were determined to be well-aligned. The areas of strength, as well as the areas in need of continuous improvement, were clear and consistent. This data is a good example of support through triangulation. The Educational Leadership program needs to focus more on Standard 3 “Management” and Standard 5 “Family and Community”, particularly the areas of budgeting, scheduling, providing PD in research-based strategies, and family, school, and community connections and services.

The areas listed above will be addressed more in depth during Educational Leadership coursework and internships. Budget and scheduling will be foci during “Leadership for Learning: Management” and through Seminars offered for the students on these specific topics. Providing PD will be a more intentional focus in the course, “Curriculum, Instruction, and Assessment”. Family, school, and community services will be emphasized in “Meeting the Needs of Diverse Learners” and “School, Family, and Community Relations”. In addition, Seminars will be offered for students on these specified topics. In addition, new “must dos” have been developed for internships that will provide students with more active involvement “out in the field” in these areas.

End of program surveys, surveys of employers, and 1 and 3 year follow up surveys of program completers are being, and will continue to be, administered on a regular basis and data will be analyzed to monitor progress in these identified areas. Data will be shared with the EL adjunct committee and the Iowa Center Advisory Committee and recommendations will be made for continuous improvement in these areas, as well as in the other ISL.

Name of Assessment Coordinator: Norene Bunt
Name of Program: IA Reading Teacher K-8 (#148), Reading Teacher 5-12 (#149), and Reading Specialist (176) Endorsements
Date: September 22, 2014

1. Assessment Results from 2013-2014
The Iowa Center is now consistently administering end of program completer surveys and systematically requiring capstone portfolios from endorsement completers (who applied after July 1, 2014). Both of these assessment tools are/will be analyzed using the prescribed rubrics. There were no completed portfolios as of the current time for endorsements #148/149.

In reviewing the 2013-2014 Reading Specialist #176 completers’ portfolios and end of program completers’ surveys, there is strong evidence that the Reading Specialist program prepares our students well in the Reading standards. There were no areas for improvement noted for this endorsement program.

Upon review of the #148/149 Reading endorsement completers end of program surveys it is evident that students feel well-prepared in the Reading standards. There was one specific area indicated for continuous improvement based on the end of program surveys – “effective strategies for facilitating English language development for all learners”.

The area of “effective strategies for facilitating English Language development for all students” will be addressed more in depth during the courses: “Improving Oral Communication” and “Teaching the Art of Writing”. The focus will be on the current need for ELL instructional strategies in today’s classrooms.

End of program surveys and capstone portfolios will continue to be administered on a regular basis and data will be analyzed to monitor progress in this identified area. Data will be shared with the Iowa Adjunct committee and recommendations will be made for continuous improvement in this area, as well as in all of the Reading Standards.

Name of Assessment Coordinator: Norene Bunt
Name of Program: IA Talented and Gifted Endorsement (107)
Date: September 22, 2014

1. Assessment Results from 2013-2014

The Iowa Center is consistently administering end of program completer surveys and systematically requiring capstone portfolios from endorsement completers. Both of these assessment tools are analyzed using the prescribed rubrics.

In reviewing the 2013-2014 TAG completers’ portfolios and the TAG end of program completers’ surveys, there is strong evidence that the Talented and Gifted endorsement program prepares our students well in the GTE standards overall. Students’ portfolios are well-developed and clearly provide evidence of proficiency in the standards. There was one specific area indicated for continuous improvement based on the end of program surveys: “oral and written communication and assistive technology for communication.”

The area of “oral and written communication and assistive technology for communication” will be addressed more in depth during the course: Instructional Strategies for the Gifted.
End of program surveys and capstone portfolios will continue to be administered on a regular basis and data will be analyzed to monitor progress in this identified area. Data will be shared with the Iowa Adjunct committee and recommendations will be made for continuous improvement in this area, as well as in all of the GTE Standards.

Name of Assessment Coordinator: Susan Hughes
Name of Program: Master of Arts in Education
Date: September 30, 2014

1. Assessment Results from 2013-2014

In previous years, we have used data from the end of program and the Proseminar course evaluations for data reporting. During the 2013-14 academic year, a new, comprehensive data plan was developed using course-related outcomes tied to specific course assignments and activities. These outcomes will be rolled into the assessment plan over the next several academic years, and will be assessed on a cyclical basis, reporting two outcomes each year. For the year reported herein, Outcome One: *Synthesize information and experiences to grow professionally and actively participate in the educational community* was assessed utilizing one criteria, the book reflection rubric from EDUC 604. Although the results that were reported this year met the criterion (mean of 94.5 for the 162 students who were assessed), we will add two additional measures in future years once the assessment plan is totally in place. We feel that this will provide a more broad and meaningful assessment of our students’ ability to demonstrate written synthesis at the graduate level.

In 2014-2015, we will collect results for the next two learning outcomes in our cycle of assessment and will also follow up on the results for synthesis by reporting the two additional criteria, and breaking down the content of the synthesis paper by individual outcomes. The primary goal, and the thrust of the activity this year will be to hold professional development sessions with the faculty members who teach all of the core courses to support them in their integration of the specific course rubrics that will be utilized for each of the outcomes. The plan includes utilizing the rubric function on Moodle so that the instructors can make this a part of their grading practice and the results can be converted to an Excel spreadsheet for ease of reporting. The assessment coordinator for the program will hold several ‘boot camp’ types of in-service sessions in order to facilitate this process.

Name of Assessment Coordinator: Val Krage
Name of Program: Undergraduate Education
Date: September 25, 2014

1. Assessment Results from 2013-2014

When completing our program assessment in fall 2013, we determined that our previous measures of student learning—portfolio submission and Praxis II scores, did not provide an accurate picture of student performance for multiple reasons, as evidenced by the fact that the criterion for every learning
outcome has been consistently met for the past six years. We therefore put an action plan into place for the 2013-14 school year that included an extensive review of our curriculum, and curriculum revisions to prepare our students for the Foundations of Reading test and for edTPA. While significant progress has been made, including focused work to map and fill gaps in the curriculum across the education program, the magnitude of this effort, as well as transition in faculty and department leadership, prevented us from formally tracking these changes for the 2013-14 school year.

In 2014-2015, we will continue our work to define authentic assessments of student learning and growth. We will develop embedded assessments for both oral and written communication, which will be administered in education courses at the freshmen, sophomore, junior and senior levels. We will also revise our student teacher observation/evaluation form to align with the edTPA assessment, as well as to provide more objective and useful information regarding student performance. We may identify additional objectives for student growth based on these revisions.

Name of Assessment Coordinator: Jeanette Armstrong
Name of Program: WI Cross-Categorical Special Education License (801)
Date: September 30, 2014

1. Assessment Results from 2013-2014

Last summer was the first time that students began to complete the Cross-Categorical Special Education program. In the time that the students were enrolled in the program, significant changes were made to the program format and required credits. For example, the entire program moved from a face-to-face format to an entirely online format; required program credits were reduced from 26 credits to 19 credits; and the state of Wisconsin mandated that educators earn passing scores on the Wisconsin Foundations of Reading Test (WFRT). Due to the incredible change that took place within the program, many areas of the program assessments reflect “criteria not met.” However, this is not a concern; it is reflective of a program in the midst of change. Over the upcoming year, the program requirements will stabilize and faculty will continue to define assessment (e-portfolios, signature assessments, and rubrics). I was pleased with the overall scores for the WFRT- 90% of students passed the test on the first attempt (N=10).

In 2014-2015, we will collect portfolio assessment results for each course in the program. Signature assessments will be embedded into each course, and common rubrics for each signature assessment will be collected and analyzed. The results of both will be used to make necessary curricular changes. We will begin determining methods and strategies for embedding literacy and literacy assessment into each course in the program; this will provide students with needed support to acquire the skills that are assessed on the WFRT.
1. Assessment Results from 2013-2014

We only have one measurement to report on this year and that is on whether or not 90% of the students in the program reached the benchmark of having a 3.6 average on the Essential Questions. The only standard that missed this benchmark was Standard 4 on which 88% of the students obtained a 3.6 average. Since this was not missed last year we will keep an eye on it, but do not think it is anything to worry about.

Just like with the Principal licensure program we need to find a different benchmark that can track the progress of this program because the use of the capstone is mandated as part of the practicum course and therefore not as good of performance measure. We also have to make sure that the Exit Survey (End of Program Survey) is given out. We may have to revert back to the pencil and paper method, since it was 100% reliable. As with the principal licensure program, it would be advised that students are evaluated on their ability to summarize a paper for each standard on the “Look Fors”.

***************

1. Assessment Results from 2013-2014

There were no unclosed loops nor follow-up actions required for the 2013-14 assessment results. Students who began the program in fall 2012 and completed it on or before summer 2014 were the first cohorts to experience the once-a-year vs. once-every-two-years schedule for the launching of a new course cycle. Thus they had the opportunity to catch up with any missed courses without having to wait two years for the course to come around again.

Average response ratings increased for each question on the Program Evaluation survey from the 2012-13 assessment cycle to the 2013-14 cycle. The completers’ overall average rating of the program increased as well.

As was noted last year, the Wisconsin Foundations of Reading Test became consequential for program completers who were endorsed for licensure after January, 2014. To date four students have attempted the test and all have passed.

The test results are reported for four subareas: Foundations of Reading Development, Development of Reading Comprehension, Reading Assessment and Instruction, and Integration of Knowledge and Understanding. The first three categories are related to the multiple choice section of the test and the final category to the open-response section of the test. For each subarea the student is given one of four ratings. This data will be used in part to assess the effectiveness of the instruction in the Emergent
Literacy (Pre-K-3) course in preparing our candidates for teaching early literacy. If there are patterns showing weakness in a given subarea, we will focus on improvement in that area. The Wisconsin Foundations of Reading Test data will be reported under Outcome 5: Using Content Knowledge to Build Meaningful Curriculum and Outcome 4: Using Developmentally Effective Approaches to Connect with Children and Families.

Please note that Outcome 5 is one of the three outcomes where the assessment goal was not met for the 2013-2014 school year. Because the results were insignificant, no significant changes are planned for 2014-2015. The data will be monitored for one year and revisited in fall 2015.

Name of Assessment Coordinator: Val Krage
Name of Program: WI Post Baccalaureate Teacher License
Date: September 25, 2014

1. Assessment Results from 2013-2014

When completing our program assessment in fall, 2013, we determined that our indicators of student learning—portfolio submission and Praxis II scores, did not provide an accurate picture of student performance for multiple reasons, as evidenced by the fact that the criterion for every learning outcome has been consistently met for the past six years. We therefore began work during the 2013-14 school year to review the post-bac curriculum, to map and embed assessments, and to prepare our students for edTPA, a national assessment that will become a consequential benchmark next year for all students pursuing a license. As with the undergraduate program, progress has been slower than we would like, but we have identified the gaps in our curriculum in the areas of assessment, differentiation and inclusion, and emergent literacy, and will continue our work to fill these gaps and to identify authentic assessments throughout the course of the program.

In 2014-2015, we will continue our work to define authentic assessments of student learning and growth. We will develop embedded assessments for the areas we have identified as having gaps, as well as in the areas of oral and written communication. We will also revise our student teacher observation/evaluation form to align with the edTPA assessment, as well as to provide more objective and useful information regarding student performance. We may identify additional objectives for student growth based on these revisions.

Name of Assessment Coordinator: Jim Bagniewski & Scott Mihalovic
Name of Program: WI Principal License (51)
Date: August 28, 2014

1. Assessment Results from 2013-2014

There were three standards in which the benchmarks were not obtained:
Standard 4 – Only 83% of the students in the 2012-2014 cohort indicated a positive understanding of the concepts in this standard (a positive understanding is an “agree or positively agree” response and our benchmark is 90%). The other benchmark for this standard was attained.

Standard 5 – 89% of the students in the 2012-2014 cohort indicated a positive understanding of the concepts in this standard (benchmark is 90%). The other benchmark for this standard was attained.

Standard 7 – 82% of the students in the 2012-2014 cohort indicated a positive understanding of the concepts in this standard (benchmark is 90%). The other benchmark for this standard was attained.

The only deficit standard from last year is standard 5 and it missed the benchmark by only one percentage point and therefore we do not believe it is something to be concerned with.

Last year the primary focus of this licensure program was finding a replacement measurement for the capstone portfolio and it appears it will be our main goal again. The thinking was that the Common Formative Assessment may have worked as a replacement accountability measurement but after assessing the 1st writing of the students’ papers in WI. If nothing else it needs some revisions. The recommended revisions would include a written set of directions that would be given to all the instructors giving the assessment for consistency, along with an enhanced rubric.

********************

Name of Assessment Coordinator: Jeannette Armstrong
Name of Program: WI Reading Specialist (17)
Date: September 30, 2014

1. Assessment Results from 2013-2014

In January of last year, the state of Wisconsin mandated that Reading Specialist 17 candidates earn a passing score on the new Wisconsin Foundations of Reading Test (WFRT). Between January and September, 100% of our Reading Specialist 17 candidates passes the WFRT on their first attempt (N= 5).

In 2014-2015, we will collect portfolio assessment results for each course in the program. The rigor of the portfolio assessments will be evaluated. We will begin determining methods and strategies for embedding WFRT sub-set specific literacy and literacy assessment into each course in the program; this will provide students with needed support to acquire the skills that are assessed on the WFRT.

********************

Name of Assessment Coordinator: Jeannette Armstrong
Name of Program: WI Reading Teacher (316)
Date: September 30, 2014

1. Assessment Results from 2013-2014

Last year the Reading 316 program focused on developing an e-Portfolio to replace the previously existing paper portfolio. This change brought about much scrutiny of the desired outcomes and criterion of the overall portfolio assessment process. It was noted that the paper portfolio was a one-time only snapshot of the student’s acquisition of knowledge and skills. In an effort to move from a one-
time only snapshot to a “growth over time model”, the rigor of the portfolio expectations increased. As a result, numerous portfolio resubmissions became necessary. Although we did not meet the criteria in many portfolio areas, I do not see this as an area for concern; it is reflective of a program that is experiencing rapid change. In January, the state of Wisconsin mandated that Reading Teacher 316 candidates earn a passing score on the new Wisconsin Foundations of Reading Test (WFRT). Between January and September, 100% of our Reading Teacher 316 candidates passes the WFRT on their first attempt (N=36).

In 2014-2015, we will collect portfolio assessment results for each course in the program. Signature assessments will be embedded into each course, and common rubrics for each signature assessment will be collected and analyzed. The results of both will be used to make necessary curricular changes. We will begin determining methods and strategies for embedding WFRT sub-set specific literacy and literacy assessment into each course in the program; this will provide students with needed support to acquire the skills that are assessed on the WFRT.

Name of Assessment Coordinator: Jim Bagniewski & Scott Mihalovic
Name of Program: Director of Special Education & Pupil Services License (80)
Date: August 29, 2014

1. Assessment Results from 2013-2014

For this Licensure program similar to the Director of Instruction licensure program we only have one benchmark to report on. As in the other licensure program we are no longer using the Capstone portfolio as a measurement instrument. The Exit was not given for the 2nd year and a row so that leaves us with only a report on whether or not 90% of the students received a 3.6 average or higher on their Essential Questions. Unlike the other licensure program the Director of Special Education and Pupil Services students do not go through the program as a cohort. What that means is that when the Access Data Base program is run there may be a number of students with “0’s” because he/she may not have taken the course yet. With this in mind our 90% benchmark was only attained under standard 1. Standard 2 – 83%, Standard 3 – 60%, Standard 4- 67%, Standard 5- 83%, Standard 6- 58% and Standard 7 – 67% --- the % is the % of students who obtained a 3.6 or higher. We need to align this measurement with the students who completed the Practicum course and not in a cohort per se.

As in the other programs I will need to come up with an assessment plan to replace our analysis of the capstone portfolio since that is now going to be part of the practicum course grade. With this program it imperative to have the Exit Survey given and check the percent of students with a 3.6 average or higher and have completed the Practicum course. As was suggested with the Principal and Director of Instruction Licensure program, we believe it would make sense to assess the students on their progress toward understanding the standards by addressing the “Look Fors” with this license.
Name of Assessment Coordinator: Jim Bagniewski & Scott Mihalovic  
Name of Program: WI Superintendent License  
Date: August 29, 2014

1. Assessment Results from 2013-2014

In six of the seven standards, one of two benchmarks were met and frequently, the one which was not met was within percentage points of meeting the benchmark. In standard 4, both benchmarks were met. Therefore, we will monitor but at present we do not believe it is something to be concerned with. In standard 7 we had only 73% so we will monitor that standard more closely. Only 7 Superintendents completed the exit survey.

We will also have to find an alternative assessment to the use of capstone portfolios since the practicum will incorporate the capstone into its course grade. We are currently looking at the feasibility of measuring progress toward understanding the standards by addressing the “look fors” with each license. We will meet with the adjuncts to be sure ALL superintendents complete the exit survey in their final course. This gets complicated because with the superintendents the practicum is not always the final course.

***************

Name of Assessment Coordinator: Kyle Backstrand  
Name of Program: Biochemistry & Chemistry  
Date: September 29, 2014

1. Assessment Results from 2013-2014

We are analyzing results this year for Outcome B – Communications and Outcome E – Ethics.  
Outcome B: Communications – Chemistry & Biochemistry

Our first assessment method is a research proposal oral presentation in CHEM 397 – Introduction to Research. Our criterion is that 80% of chemistry/biochemistry majors will score 80% or higher on the presentation rubric. Our results are as follows: 83% (5/6) of chemistry/biochemistry majors scored 80% or higher. We met our criterion.

Our second assessment method is a research proposal written paper in CHEM 397 – Introduction to Research. Our criterion is that 80% of chemistry/biochemistry majors will score 80% or higher on the paper. Our results are as follows: 83% (5/6) of chemistry/biochemistry majors scored 80% or higher. We met our criterion.

Our third assessment method is a research oral presentation in CHEM 499 – Senior Seminar. Our criterion is that 80% of chemistry/biochemistry majors will score 80% or higher on the presentation rubric. Our results are as follows: 100% (4/4) of chemistry/biochemistry majors scored 80% or higher. We met our criterion.

Our fourth assessment method is a research written paper in CHEM 499 – Senior Seminar. Our criterion is that 80% of chemistry/biochemistry majors will score 80% or higher on the paper. Our results are as follows: 100% (4/4) of chemistry/biochemistry majors scored 80% or higher. We met our criterion.

Outcome E: Ethics – Chemistry & Biochemistry
Our first assessment method is an ethics assignment in CHEM 120 – General Chemistry I. Our criterion is 80% of chemistry/biochemistry majors will score above 80%. Last year we had the students answer questions based on reading the Chemists’ Code of Conduct. We did not grade the assignment but 100% of students did complete the assignment. We will start a discussion at the department level about either changing the criterion for this assessment method or replacing the method.

Our second assessment method is an ethics assignment in CHEM 397 – Introduction to Research. Our criterion is 80% of chemistry/biochemistry majors will score above 80%. Our results are as follows: 83% (5/6) of chemistry/biochemistry majors scored 80% or higher. We met our criterion.

Our third assessment method is an ethics essay from the final exam in CHEM 397 – Introduction to Research. Our criterion is 80% of chemistry/biochemistry majors will score above 80%. Our results are as follows: 100% (6/6) of chemistry/biochemistry majors scored 80% or higher. We met our criterion.

Our fourth assessment method is a Data Analysis question on an exit survey in CHEM 499 – Senior Seminar. The question states “My knowledge/skill/application of evaluating the ethical issues surrounding research is at what level compared to all college graduates in the sciences (at Viterbo and other institutions)?” Our criterion is 80% of chemistry/biochemistry majors will choose “superior” or “above average”. We did not reach our goal with only 69%. This is the second year that we have asked that exact question on the senior survey. Therefore our action plan is to take a wait-and-see approach and try to observe a trend in this student confidence issue. It may be that the criterion should be lowered.

Eventually, we hope to have three years’ worth of data to analyze each year for two different outcomes (we started this new plan last year). Also, the Chemistry department is currently undergoing a major shift in the way we teach our general chemistry sequence. We are ‘flipping’ our classes in CHEM 120 and CHEM 121 and this may have an impact on our assessment in the coming years.

****************

Name of Assessment Coordinator: Michael Alfieri
Name of Program: Biology
Date: October 6, 2014

1. Assessment Results from 2013-2014

The biology program focused on:

OUTCOME: 1. “Understand importance of interrelationships and unifying themes of major biological concepts” subsections A. Evolution explains the unity and diversity of life, B. Cells, the basic unit of life, C. Importance of genetic variability and mechanisms that lead to variability in BIOL 340, BIOL 250.

We found subsection A met criteria in the mastery level based on two questions. These questions were follow-up assessment from previous year’s data in which criteria were not met at the upper-level and for the same cohort as assessed this year, were not met at the intermediate level. We are pleased to see this positive outcome in reporting the data. We have closed this loop. Subsections B and C showed mixed results at the intermediate level. That is, some criteria were met and others were not as demonstrated by the differences in correct answers depending on the questions. We will review the difficulty of these questions and reassess.

We concluded that assessing only a few subsections for this outcome may not provide the data needed to most accurately assess the outcome. Therefore, we plan on assessing all subsections for this outcome next year with a focus on the mastery level assessment (i.e., upper-level courses). We hope
this will provide a better picture of whether students are meeting program goals for such a complex outcome.

OUTCOME 2: “Scientific method...” Subsections D and E presentations of data in written and oral forms in BIOL 499. We were pleased to find students met criteria for such an important measure of our program.

OUTCOME 4: Ethical issues in BIOL 160 and senior survey. Although our measure of introductory assessment of this outcome were not met, upper-level students in the senior survey self-report as having above average abilities. Therefore, we will consider adding a more direct measure in the upper-level course.

We will reevaluate which and on what schedule we assess outcomes. Our plan is to focus on mastery level next year for all subsections of outcome 1. We hope this will provide a clearer picture of program outcomes being met. We will also continue to track senior capstone projects for scientific reporting (written and oral). We will train two new faculty members in the department on our assessment methods and procedures. Finally, we will need to determine a mechanism for adding outcome 3 as we have not done this in several years.

Name of Assessment Coordinator: Michael Alfieri & David Bauer
Name of Program: Biopsychology
Date: October 6, 2014

1. Assessment Results from 2013-2014

For the biopsychology program we assessed:

OUTCOMES 1 and 7: interrelationship and foundational theory. This outcome’s criteria were met with a focus on BIOP 261 (a course specifically for the biopsychology major). This is a key introductory and intermediate course for the major and we would like to add an additional hour of lab based on the work being done and assessed in this course (currently has a 2 hour lab where most other majors science course have a 3 or 4 hour lab). We also found that in longer essay type questions, student in BIOP 261 did not met the criteria of OUTCOME 7. We will continue to measure these types of questions in this and other required courses.

OUTCOMES 2 (writing) and 5 (collateral skills) were lacking based on direct measures in the senior capstone and indirect on senior survey. We feel that additional instruction and focused science courses in writing and data analysis are needed.

The biopsychology committee is working to restructure this program based on best practiced published in the peer-reviewed literature (two representative articles are attached to TracDat) and on previous years’ assessment. We found that several of our outcomes are difficult to measure, too broad, no longer appropriate based on our proposed restructure, or too similar. Therefore, our plan for 2014-2015 is to refine several of the program’s outcomes and align courses to these new outcomes. The biopsychology committee will work to align the published objectives and outcomes with our current plans and map these to current courses at Viterbo which are most appropriate and serve the majority of our student’s interests and career goals (i.e., pre-health, professional schools and graduate schools). The biopsychology program is designed not as a standalone department (due to limitations of faculty in this area and student population), but rather a program housed in the biology department and we will work
to further develop the program with improvements to current biopsychology courses and with the addition of current biology and psychology courses where possible. We also found that student writing and collateral skills were underperforming. These data were seen this year as a follow-up from last year’s data as well. Therefore, we will consider the overall program to include courses that support these important outcomes and include additional assignments in current courses where possible.

***************

Name of Assessment Coordinator: Michael Alfieri & Jennifer Sadowski
Name of Program: Environmental Biology
Date: October 6, 2014

1. Assessment Results from 2013-2014

This is the first year of this new major for the biology department. On TracDat we have added a mission, outcomes, established a working plan with outcomes aligned with teaching strategies and methods and identified specific courses to assess outcomes. The working document is attached to the TracDat page as are BIOL major courses that are representative of classes from which we will collect data. Additionally, a 2014 curriculum map has been added to the documents for environmental biology in TracDat.

We will add proposed assessment methods to TracDat after feedback from the assessment committee. We will begin to collect data in the proposed classes.

***************

Name of Assessment Coordinator: Michael Alfieri
Name of Program: Environmental Studies (minor)
Date: October 6, 2014

1. Assessment Results from 2013-2014

We assessed the mastery of a formal written lab report. This assignment is in the online ENVS course over the summer and fall semester. The criteria was met. We were not able to identify current environmental studies minors in the course. There is no single course to determine if a student has declared the minor or not. Additionally, I believe that this was the first year that the environmental studies minor was to be offered.

The minor has a single required course with various other options. That course is ENVS 325 (was ENVS 400) and has not been offered for several semesters as there has been no minors needing the course. We plan on offering it through CAL to increase enrollment and hope to get the course offered for other programs as well. We will explore the need for assessment of this minor given the new environmental biology major and the new environmental science minor and the sustainability minor. Environmental science is not listed as a minor in the 2014-2015 course catalog.

***************
Name of Assessment Coordinator: Sheldon Lee  
Name of Program: Mathematics  
Date: October 1, 2014

1. Assessment Results from 2013-2014

This past year, we no longer assessed each student on a holistic level by subjectively averaging their performance throughout the class, as we had done in the past. We looked at specific course assignments, projects, and exam questions. We believe that by doing this we will begin to address several weaknesses in our assessment plan that we have had in the past. We have consequently made substantial changes to our rubric to reflect the new assessment methods. Specifically, we updated the rubrics for deductive reasoning, oral communication, written communication, and independent research. During the year we measured five of our six outcomes. We assessed deductive reasoning in both MATH 260 and MATH 420. In MATH 260 we found that all but one of our students met expectations in this area. In MATH 420 13 of the 14 majors were meeting our expectations. We measured technology use via a set of assignments in which students are required to use LaTeX to successfully typeset a mathematics proof. All of our students achieved this objective. We assessed the oral communication outcome by looking at scores on a math history presentation in MATH 499, with 13 of our 14 majors meeting our expectations. We assessed the written communication outcome in MATH 340 and MATH 321. In MATH 340, a final proof assignment was used, with 10 of the 13 students were able to achieve a score of 3 or 4 and the average score was 3.41 on a scale out of 4. In MATH 321, this was assessed on the final examination by a single question. The average score was 2.89 with only 4 of 13 (31%) achieving a score of 3 or 4. We assessed our new independent research outcome via student scores on final projects in MATH 260. Two of the four students scored rather weak in this area. However, we are satisfied because this course is taken very early point in the students’ program.

We plan to refine the updated rubrics as re-write the rubrics for the problem solving and technology use outcomes during the 2014-2015 year. We will continue to monitor the deductive reasoning outcome in MATH 260. We think that looking at a LaTeX assignment may not be the best measurement of a student’s ability to use technology. We plan to look at their ability to write programs and perform computations in R and Matlab during the 2014-2015 school year. We plan to assess this outcome in MATH 230 and MATH 365.

Name of Assessment Coordinator: Michael Alfieri  
Name of Program: Sports Science and Leadership  
Date: October 6, 2014

1. Assessment Results from 2013-2014

We assessed several outcomes and I will focus on those taught from the science perspective. Outcomes 1-3 (below) are taught outside of the science program as part of the major  
OUTCOME 1 Cultural/international tradition in SPSL 220 (history of sports) criteria met  
OUTCOME 2 Managerial and leadership theory in SPML 320 criteria met  
OUTCOME 3 Ethical and social in SPML 320 criteria met  
Outcomes 4-5 (below) are taught in the science program as part of the major  
OUTCOME 4 understanding the human body in SPSL 331 and 338 criteria met (taught by science adjunct)
OUTCOME 5 promote health and well-being in SPSL 110 criteria not met (thought by science adjunct) and SPSL 331 criteria met (taught by adjunct). Overall we were pleased to see outcomes being met. We agree that we should continue moving towards more diverse measures (beyond multiple choice questions in the SPSL science courses for assessment). We are somewhat concerned by the amount of adjuncts teaching these courses. We don’t have full-time faculty with the background to teach the SPSL courses so assessment is done with the help of adjunct faculty (often not the same ones from year to year). We are thankful for the talented and dedicated adjuncts we have been able to hire. For example, from the previous year’s assessment, we determined that a standard assignment should be developed for the outcome “Promote Health and Well-being” Sport Science student will develop an exercise plan to promote health / fitness based on accumulated knowledge in SPSL 331 Exercise Physiology. A standard assignment was written and scored (attached doc in TracDat) from Brad Northrup – biology adjunct.

We have also noticed a shortcoming in the first year course (SPSL 110) student performance in meeting outcomes. We have tried to reword questions and assignment types however we are still finding this class to be a challenge to many first year SPSL students. Of those not meeting the criteria, many are unable to continue in the SPSL program due to overall low grades. For those students continuing in the program, several questions were used and we find those students are meeting the criteria. However, through advising we have noticed that many of these same students struggle in the BIOL, CHEM, PHYS and other science courses.

We will continue to track SPSL students in their sciences courses outside of SPSL (e.g., BIOL, CHEM, and PHYS) partly through advising given the diversity of these courses to determine if the methods of assessment for SPSL are appropriate. From previous assessment and follow-up work noting student success in their major and mapping this to career goals and science coursework required outside of the SPSL courses, we are finding talented students are often better served to major in BIOL and minor in SPSL as a means of meeting certain career goals (e.g., physical therapy). The SPSL minor is a new minor and is in part the result of assessment work done for the major in realizing the program requirements and career plans of many students. We are working to advise students with specific career goals to consider alternate course selections based on performance in introductory level coursework (as seen from assessment in SPSL 110) and major level courses (i.e., BIOL 160, 161, CHEM 120, 121, MATH 113). We will also continue to develop assessment measures in addition to multiple choice questions. We will need to continue to work with adjunct faculty and continue to request faculty support to aid in the major.

### 2014 Academic Program Assessment Summaries

**Name of Assessment Coordinator:** Deane Hatteberg  
**Name of Program:** BSN Nursing  
**Date:** September 27, 2014

1. **Assessment Results from 2013-2014**

Last year we focused on two of our nine outcomes. Three of the four methods met the criteria for ethical issues. One method that had a diversity component may have had confusing wording. The focus question was reworded and will be evaluated fall 2014. For critical thinking the criterion for all measures were met. There was a recommendation to improve the weak area of measurable outcome identification. This enhancement will begin fall semester. Last year was also a follow up year for communication. The criteria was met.

2. **Plan for 2014-2015**

In 2014-2015, we will collect results for the next learning outcomes in our cycle of assessment and will also follow up on results for critical thinking and for ethical reasoning. Our program has new outcomes based on new standards for the nursing profession. This will be the last assessment for professional nursing roles and aesthetics. The professional values is a new program that will be measured at the developmental level. The curriculum is in the process of some revision for the future.

***************
1. Assessment Results from 2013-2014

All six program outcomes (previously described as graduate outcomes) were fully implemented and two of the six were evaluated to measure achievement. The two program outcomes include:
- Incorporate effective interpersonal and inter-professional communication and collaboration skills
- Articulate the direct and indirect relationship of healthcare policy, finance, and regulations.

Two new courses were created related to university changes, and new Course Overview and Assessment (COA) tools were created. One course was changed from a 400 level to a 300 level to better reflect the level and rigor of the course requirements. Nursing 481 – Clinical Synthesis Portfolio was changed from a four to a three credit course, reflecting the change in the number of program outcomes required for mastery.

All courses were assessed using a Course Assessment and Analysis (CAA) tool, from the School of Nursing. New assignment specific rubrics from the first nursing course were created and piloted for effectiveness to better measure achievement of course outcomes. It was determined this is an effective approach for all assignments and additional rubrics will be created for each assignment in the next academic year.

Last, based on the assessment of each course using the university online evaluation tool, all course specific data were synthesized. Results from the following questions “Course teaching-learning methods supported course objectives,” “Technology was used effectively in this course,” and “Textbooks and/or learning materials were used appropriately in this course” revealed means greater than 4.0 on a 5.0 Likert scale for all nursing courses.

Faculty made revisions to the nursing leadership issue paper and the leader/manager paper, providing clarity and added rigor. None of the previous assignments stood out as course concerns in 2013-2014 according to means data from the online university evaluations, and from student narrative feedback on the university evaluations.

We continue to conduct focus groups as a means of assessment, on a rotating basis at each site. Data was shared with all persons directly involved with our program to determine how we can best meet our student and program needs. Students voiced concerns over amount of assignments/reading required in a number of core curriculum courses. It continues to be a concern that many of the faculty do not seem to teach using adult learning principles, allowing depth and analysis versus amount. This was shared with the Director of Adult Learning. As well, some students voiced concerns over lack of response from faculty in several online courses. This was shared with the Director of Adult Learning as well as the Program Chair directly involved. Students continue to voice concern about the amount of work required during the summer courses, which include Mission 470, Nursing 450 and Nursing 451. Because of this continued concern, the program course plan will be changed in fall 2014 to better distribute courses offered each semester. We will continue to monitor these courses and make program changes as necessary.
End of program (EOP) narrative results will be disseminated to faculty and Director of Adult Learning once available (Fall 2014). Alumni surveys are sent out via e-mail and results will be shared once obtained.

In 2014-2015, we will collect results related to two School of Nursing program outcomes. We will be assessing the outcomes:
- Assimilate professional values of altruism, autonomy, human dignity, integrity, and social justice.
- Integrate health promotion, disease prevention, and safety principles for individuals and populations.

We will follow new course outcomes and assignments closely to assure we are meeting the established course/program outcomes. Faculty will meet monthly or every other month to review assignments using new rubrics. We will continue to finalize assignment specific rubrics in N472 and N408; those are the only remaining syllabi to complete.

We will continue open discussion with those involved teaching core curriculum courses as they relate to teaching adult students and share concerns with department chairs, and the Director for Center for Adult Learning.

Name of Assessment Coordinator: Bonnie Nesbitt
Name of Program: Graduate Nursing
Date: September 30, 2014

1. Assessment Results from 2013-2014

In 2013-14 we collected assessment data on two outcomes according to our scheduled cycle: Practice in an expanded, specialized, and/or advanced practice role and Facilitate the translation of research and evidence into practice. We piloted the rubrics to be used for assessment for each of these outcomes and critiqued their ease of use and congruency with the selected course embedded assignments; this action will need to be continued. We streamlined our processes for outcome assessment by the course faculty at the time the assignment is turned in for course grading purposes. To this end we created a shared file where faculty can put the mean scores in of their class based on a 1-3 scale with 3 being the highest rating after reviewing the course embedded assignments.

We have continued with using the TYPHON portfolio for the repository of the student’s course embedded documents. Two classes out of three used TYPHON with the third year class using flash drives. The flash drive approach has not been effective (students lose; don’t turn in; faculty forget to ask for flash drive to check uploads, etc.), so Typhon will be the approach of monitoring development of the outcome over time per student for all classes in future including the post MSN DNP Students; check point times for the portfolios need to be established.

Course embedded grids for the portfolio template were developed for the post MSN DNP students (who are already NPs or enrolled in the Ethical Leadership DNP), as well as the post MSN DNP students seeking initial NP certification.

In 2014-15 we will collect assessment data on all six outcomes but focus on two in specific according to our scheduled cycle: Affirm the dignity of life and human diversity and Advocate for quality outcomes for individuals, families, populations, and systems. We will continue to critique the rubrics to be used for assessing each of these outcomes and fine tune their congruency with the assignments. We will continue to streamline our processes for assessment at the time the assignment is turned in with the shared file. We will continue using TYPHON for the repository of the student documents. We will develop at least one portfolio checkpoint at mid program and the processes that need to be put in place to assure this is done.

Name of Assessment Coordinator: Carol Klitzke
Name of Program: Coordinated Program in Dietetics
Date: September 30, 2014

1. Assessment Results from 2013-2014

In 2013-14 we focused on 13 competencies in the category of Professional Practice Expectations as specified in the 2012 Standards of Education published by our accrediting body. Data were reported for 10 of the 13 competencies. Criteria were met for eight of the competencies, but were not met for one of five assessment methods for CRD 2.1. Two methods were used to assess CRD 2.4 (Use effective education and counseling skills to facilitate behavior change) and neither were met. The action plan, discussed at our annual curriculum review meeting, is to schedule student counseling sessions earlier in the semester so that there is more time to complete required sessions. The number of sessions will be increased from two to three. We closed the loop for CRD 1.4 “Evaluate emerging research for application in dietetics practice” by adding a new lesson/activity on using online data bases, by implementing a 2-hour lab on poster presentations, and by altering the due date for the final report to allow time for better feedback.

This year we will assess the competencies in the Clinical and Customer Services category. In addition we will follow up on competencies not met in previous years. CRD 4.4 and CRD 1.1 were not met in spring of 2012 and data from 2013 was not reported. Both are from NUTR 476 and will be reassessed this year. CO2, CO3, CO7 have not been met and need to be reevaluated this year.

Name of Assessment Coordinator: Karen Gibson
Name of Program: Dietetic Internship
Date: September 25, 2014

1. Assessment Results from 2013-2014

During the 2013-2014 academic year, collected data and evaluated the Professional Practice Expectation competencies (2.1-2.13). In addition, we implemented action plans and re-assessed the two competencies (1.3 and 4.12) that were not met in 2012-2013. The action plan for competency 1.3 states that students will be assigned a pre-class reading of a cost benefit control professional article and DI 1.3
will be re-assessed in Spring 2014. This competency was not met – 88% of students met the competency but 12% (n=1 student) missed the minimum score by 3%. As this course is being deleted, with much of the course content being rolled into NUTR 477, we are currently in discussions as to how, and during what course, this competency will be assessed.

The action plan for competency 4.12 states that the instructor will re-arrange the sequence of presentation, case study, and quiz to enhance understanding and to focus on the content the students will be quizzed over and was to be reassessed in Fall 2013. This competency has now been changed to 4.11 and 100% of students achieved the minimum score of 80%, therefore this competency is now MET.

All of the Professional Practice Expectations competencies (2.1-2.13) assessed this past year, were met at the benchmark level. One competency, 2.13, received many “N/A” scores – we will evaluate the specific course this will be assessed in for future years, rather than evaluate in all courses.

Our primary focus for assessment work in 2014/2015 will be to continue to implement the comprehensive assessment that the department developed in fall 2011. The competencies scheduled for assessment this year include those listed under subset 3 (CRD 3.1-3.6) “Clinical and Customer Services: development and delivery of information, products and services to individuals, groups and populations”.

Name of Assessment Coordinator: Connie M. Fossen
Name of Program: Gerontology Minor
Date: September 3, 2014

1. Assessment Results from 2013-2014

Last year we reduced the minor outcomes from five to two outcomes. It was determined that two outcomes more accurately reflected the knowledge and skill necessary for a minor in Gerontology. The Career Preparation outcome was assessed this year. An Internship Integration Paper assessed the outcome. The average score of 4.57 on a scale of 1-5 was the result of seven internship papers scored by a rubric. The criterion score of 3 was far surpassed with the average score of 4.57. This was the first year of using the Integration Paper rubric to assess this practice outcome. This assessment method will be used again in 2015-2016 with hopefully a larger student population.

In 2014-2015, results for Knowledge learning outcome will be collected in this cycle of assessment. Assessment results for 2013-2014 will be posted on the Gerontology Minor Moodle site for student review.

Name of Assessment Coordinator: Debra A. Murray
Name of Program: Master of Science in Mental Health Counseling
Date: September 30, 2014
1. Assessment Results from 2013-2014

The primary work this year was to align and refine the course syllabi, assignments, program learning goals and finalize the MSMHC Program Assessment Plan. The focus was on the following outcomes: Professional Orientation, Ethics, Diversity and Advocacy, Human Growth and Development, Career and Life Planning, Helping Relationships, Group Work, Research and Evaluation, Assessment, and Diagnosis. The methods appear to be functioning, students are able to meet and often exceed the criteria. Despite the fact that criterion are met in several cases faculty made modifications to assignments and rubrics and plan to reassess several areas as particular courses are offered. For example COUN 510 currently will be reviewed in the spring, following significant modifications to the assignments and rubrics. In COUN 630 students performed well above competency, however there will be some adjustments to streamline the course work load, given that will be a 2 credit course in the future. (Details are given in the minutes attached to the TracDat update.) These changes will be made fall semester 2014. Last year was also a follow-up year for Career and Life Planning; although we met one of criteria, Students performed lower on .75 of a point lower on this category in the CPCE. Therefore, securing a Licensed Professional Career Counselor to instruct in the course is a priority; the instructor will explore methods of instruction to increase student knowledge and skill levels.

In 2014-2015, we will collect results for the specified learning outcomes in our cycle of assessment Research and Evaluation, Assessment and Diagnosis. Of course, follow up on modifications and enhancements identified by Core faculty results for the areas, of Professional Orientation, Diversity and Advocacy and Career and Life Planning will occur. One of our goals as a department is to enhance and systematize the communication of assessment results to our majors, our advisory board, our alumni and the community. The upcoming year will be devoted to following up and assessing the changes proposed, therefore, we plan to dedicate four department meetings to assessment work, specifically during in-service and out service weeks.

Name of Assessment Coordinator: Liza Ware
Name of Program: Psychology
Date: September 26, 2014

1. Assessment Results from 2013-2014

In 2013-2014, we revised our program learning outcomes and developed a curriculum map. We will be refining the assessment methods as we assess each outcome (e.g., developing assessment rubrics that specifically capture the outcomes.) All previous learning outcomes have been discontinued in TracDat to make our report more streamlined. Loops that had not been closed as of 2012-2013 (see last year’s report) are not reported as they were part of discontinued outcomes for which there are not comparable outcomes in the new model.

To get started with our new assessment rotation, we collected data in PSYC 230 for outcome 2 (Research Skills), but the criterion was not met. We will be reconsidering our instructional and assessment methods in that course for this outcome this year.
We have additional preliminary data for outcome 2 and outcome 5 (Career Assessment) from last year that we are using to inform our refinement of assessment methods for these outcomes. We do not report this data on TracDat because the methods are likely to change this year.

Following our new assessment rotation, we will be assessing outcomes 2 (Research Skills) and 5 (Career Assessment) this year. We are in the process of deciding precisely what methods and rubrics to use to assess all of our new outcomes. We are working on identifying what specific aspects of tests or assignments we would like to capture for assessment purposes (i.e., rather than using cumulative test or assignment grades that may capture criteria in addition to those specified in the assessment outcome.) We plan on uploading relevant documents to TracDat as we finalize these details.

For outcome 2, we will be refining our assessment methods and collecting data in both PSYC 230 and PSYC 330. For PSYC 330 (taught every spring), we will develop a rubric for the final research paper that will more specifically capture outcome 2. We have data on students’ total paper scores from 2013, but that score reflects more than just the outcome 2 goals of scientific reasoning and critical thinking. Assignments and rubrics will be uploaded to TracDat once they are finalized.

For outcome 5, we will be designing and implementing assessment methods in PSYC 171 and PSYC 499. A career exploration survey or assignment will be piloted in PSYC 171 in the fall and refined as needed for the spring semester. In 499, specific assignments have been added to achieve this outcome and we will be evaluating them this year and refining the assignments and rubrics as needed. Assignments and rubrics will be uploaded to TracDat once they are finalized.

Name of Assessment Coordinator: Jennifer Anderson-Meger
Name of Program: Social Work
Date: September 4, 2014

1. Assessment Results from 2013-2014

The social work program uses ten competencies which are comprised of 42 practice behavior outcomes to determine whether students are meeting program outcomes. The competencies are essentially the program outcomes. Three measures are used to assess each of the 42 practice behaviors: course embedded assignments, ratings on the Agency Instructor Evaluation (Field Learning Contract/Evaluation), and student self-report ratings from a senior Exit Survey. Details on these measures can be found on the related documents in TracDat. During 2013/2014 the program focused on five practice behaviors (EP 2.1.2b, EP2.1.3.c.2, EP 2.2.5.b, EP 2.1.7.b, EP 2.1.10.a.1) that fell below benchmark on the course embedded measure (the Agency Instructor Evaluation and Exit Survey measures met benchmark).

The faculty met in August, 2014 to review assessment data from 2013/2014. Overall all our outcome measures are down slightly but we are meeting or exceeding benchmarks for all ten competencies. There are a five practice behavior outcomes that are below benchmark in the course embedded assignment measures (Agency Instructor Evaluation and Exit Survey measures meet or exceed
benchmark for these same practice behaviors. The National Council on Social Work Education (CSWE) is in the process of developing a new set of Educational Policy and Accreditation Standards (EPAS) that will be available in 2015. The new EPAS standards will require that we revisit our entire assessment plan and curriculum. As a result there will be potentially significant changes in our program and how we assess outcomes. Much of our process for assessing outcomes (competencies and practice behaviors) is determined by mandates from CSWE. Consequently our plan is to refine our current course embedded measures this year and consider more comprehensive revisions of our assessment program when the new accreditation standards are in place.

This year we will refine assignments being used to measure the practice behaviors that fell below benchmark for course embedded measures in the following manner:

EP 2.1.2d. Apply Ethical Reasoning: This practice behavior is measured in SOWK 482 with the Ethics Paper assignment. The instructor will place more emphasis on this assignment as a mechanism to assess ethical reasoning. Hopefully students will respond by having a more intentional emphasis on the paper. Faculty feel that the 75% of students reaching 80% (benchmark is 80% of students will earn 80% or higher) or higher on this assignment may reflect the attitude of this particular class towards the assignment rather than a true indication of their ability. The faculty believe that the students did not take this assignment seriously in spring 14 resulting in outcome for this measure falling below benchmark.

EP 2.1.4a Cultural Oppression and EP 2.1.4c Difference Shapes Life: Both of these practice behaviors are measured with the same assignment in SOWK 431 and both practice behaviors fell below benchmark. Feedback from students has indicated that the assignment is too complex and they are unable to focus and do their best work due to this complexity. The instructor will divide the assignment into three parts so the students can focus on each section.

2.1.6 Engage in research informed practice and practice informed research: The assignment has changed this year to include a class-wide project where students can help each other with the assignment. The instructor will also work on trying to identify expectations appropriate for bachelor’s level students.

2.1.9a Discover, appraise, and respond to contexts that shape practice. The faculty discussed that this is a very difficult practice behavior to measure with an assignment. The instructor in SOWK 421 will revisit the rubric and determine if there is a more effective way to measure this practice behavior from the assignment or if a different course embedded measure would be more effective (e.g., a five minute reflection paper or an exam question).

***************

Name of Assessment Coordinator: Liza Ware
Name of Program: Substance Abuse Counseling
Date: September 26, 2014

1. Assessment Results from 2013-2014

In 2013-2014, we revised our program learning outcomes and developed a curriculum map. We will be refining the assessment methods as we assess each outcome on this rotation. (E.g., developing assessment rubrics that specifically capture the outcomes.)
We also continued our data collection for outcomes 3 (Ethical Principles and Standards) and 4 (Communication Skills). For outcome 3, the criterion was met and the loop was closed on the current method being used. However, we have also concluded that a more accurate method than student’s self-assessment of their learning could be used. The same assignment will be used, but a rubric scored by the instructor will determine whether students meet the outcome. The rubric has been uploaded to the Documents section of TracDat.

For outcome 4, the criterion was not met completely using our current methods. However, we believe that the criterion of an average score of 90% is unrealistic. We will be identifying and developing appropriate methods for this outcome in the coming year.

In 2014-2015, we have 3 goals for our assessment work in this program.
(a) Continue to assess outcome 3 in ADCT/PSYC 423 using the new rubric (see above).
(b) Continue to assess the written communication component of outcome 4 in ADCT/PSYC 427 with new criteria and rubric. Assess the oral communication component in ADCT/PSYC 423 using the assignment and rubric uploaded to the Documents section on TracDat. Develop a rubric to assess the interpersonal communication component in ADCT/PSYC 423 or 427.
(b) Assess outcome 2 in ADCT 330 and ADCT/PSYC 423. Develop rubric for 330 paper to capture this outcome.

*********************
LIVE Core Curriculum: Assessment Overview

LIVE Core Curriculum Structure

LIVE includes three main components:

- **Foundations** courses, which give students underlying skills in information fluency, quantitative literacy, and written and oral communication
- **Ways of Thinking** courses, in which students learn the assumptions, methods, and questions of different disciplines
- Four sequenced **Mission Seminars**, in which students examine issues from a disciplinary lens
  1. Franciscan Values and Traditions
  2. Living in a Diverse World
  3. Serving the Common Good
  4. The Ethical Life

Assessment work in 2013-2014 encompassed seven of the eight LIVE learning outcomes. The common assignments in all four mission seminars were assessed in May and June 2014, with faculty and staff teams evaluating learning outcomes in a stratified random selection of assignments.

Following four years of targeted changes based on the assessment results, the criteria for outcomes measured in Franciscan Values and Traditions were all met. The continuous improvement stemming from assessment has included: targeted changes in the assessment methods and measurements, such as finer alignment between outcomes, assignments, rubrics, and guidelines; changes in the common text based on assessment results; refinement of the structure and curricular design of the mission seminars.

**2013-2014 Follow-up Results**

**Method:** common assignment in all VUSM 1XX sections

**Measurement:** common rubric created collaboratively and modified through the 10-13 assessment process.

**Assessment process:**

1) **Random sample of papers:** A stratified random sample of 15% of the papers submitted by students enrolled at the end of the semester was drawn. Ten sections in FA2013 and six sections in SP2014, with a total final enrollment of 303 students. 15% of 303 is 51. Fifty-one papers were drawn and two papers were used in norming. The submitted papers in one section were the wrong assignment (an early response paper, rather than the common assignment). The lowest enrollment was 11 and 2 papers were drawn. The largest enrollment was a team-taught course, with 5 papers drawn. There were no online courses (online courses are over-sampled to allow for assessment of modes of delivery).

2) **A group of 8 volunteers worked over three days in May 2014 to assess the papers.** The group consisted of four full-time faculty, one adjunct faculty, the assessment specialist, the director of general education, and the director of assessment and institutional research. It was helpful that two of the eight evaluators teach the FVT seminar. The group had a norming session to establish inter-rater reliability. The group reviewed the assignment and the rubric and scored one norming paper. After scores were compared and reviewed, a second paper was normed. Each paper was read by two readers. When a score diverged by more than one point, a third reader read that paper for the outcome that diverged. Twenty-three out of the 47 papers required a third reader; however, only eight papers diverged by more than one component on the rubric.

The assessment team analyzes results and makes recommendations for changes. The team makes some changes to the rubric, as warranted. The CC director works with the FVT lead faculty on changes in the assignment, course guidelines, or teaching and learning strategies. The results and action plan are shared the Franciscan Values and Traditions instructors in the learning community for implementation and with the Core Curriculum Committee for accountability.

#### 2013-2014 Results

**Method:** common assignment in all VUSM 2XX sections  
**Measurement:** common rubric created collaboratively and modified through 11-12, 12-13, and 13-14 assessment process.

**Assessment process:**

1) **Random sample of papers:** A stratified random sample of 15% of final enrollment numbers was drawn. There were eight sections in FA2013 and ten sections in SP2014, with a total final enrollment of 322 students. 15% of 322 is 48. Forty-eight papers were drawn and two papers were used in norming. Sections with a final enrollment of 10-16 had two papers drawn, sections with final enrollment of 17-22 had three papers drawn, and one section with an enrollment of 23 had four papers drawn. There were no online courses (online courses are over-sampled to allow for assessment of modes of delivery).

2) **A group** of eight volunteers worked over three days in May 2014 to assess the papers. The group consisted of three full-time faculty, one adjunct faculty, the coordinator for community engagement, the assessment specialist, the director of general education, and the director of assessment and institutional research. The group had a norming session to establish inter-rater reliability. The group reviewed the assignment and the rubric and scored one norming paper. After scores were compared and reviewed, a second paper was normed. Each paper was read by two readers. When a score diverged by more than one point, a third reader read that paper for the outcome that diverged. Two of the papers were excluded because they were in response to a different assignment, not the common assignment. Nineteen papers required a third reader (39%), a rather high divergence of scores; however, only four diverged on more than one component of the rubric.

**2013-2014 Results**

**Method:** Integration Paper (common assignment) in all VUSM 3XX sections

**Measurement:** common rubric created and modified collaboratively

**Assessment process:**

1) **Random sample of papers:** A stratified random sample of 15% of final enrollment numbers was drawn. Forty-five (15%) papers were drawn and two papers were used in norming. Sections with a final enrollment of 9-16 had two papers drawn, sections with final enrollment of 17-22 had three papers drawn, and the two sections with an enrollment of 23 and 24 had four papers drawn. Online courses are over-sampled (30% of final enrollment) to allow for assessment of modes of delivery.

2) **A group** of eight volunteers worked over three days in June 2014 to assess the papers. The group consisted of two full-time faculty, two adjunct faculty, one staff member, the director of general education, and the director of assessment and institutional research, and the assessment specialist. The group began with a norming session to establish inter-rater reliability. The group scored one norming paper. After scores were compared and reviewed, a second paper was normed. Each paper was read by two readers. When a score diverged by more than one point on more than one component of the rubric, a third reader read that paper for the outcome that diverged. When a score diverged on only one component, the two evaluators met together to come to a mutual agreement on the score. If the agreement was not possible, a third reader scored the paper.

### 2013-2014 Results

**Method:** Integration Paper (common assignment) in all VUSM 4XX sections  
**Measurement:** common rubric created and modified collaboratively  
**Assessment process:**
1) **Random sample of papers:** A stratified random sample of 15% of final enrollment numbers was drawn. Thirteen sections had a total final enrollment of 269 students, and 257 papers were submitted. Forty-two (15%) papers were drawn and two papers were used in norming.

2) **A group** of eight volunteers worked over three days in June 2014 to assess the papers. The group consisted of three full-time faculty, two adjunct faculty, the director of general education, the assessment specialist, and the director of assessment and institutional research. The director of general education and the director of assessment and institutional research aligned the assignment rubric with seminar outcomes and with LIVE outcomes before the assessment team convened. The group began with a norming session to establish inter-rater reliability. The group scored one norming paper. After scores were compared and reviewed, a second paper was normed. Each paper was read by two readers. When scores diverged by more than one point on just one of the nine rubric components, the two readers discussed their differences and came to a conclusion about the score. When a score diverged by more than one point on several components, a third reader read that paper for the outcomes that diverged. Thirteen of the 42 papers required a third reader.
