

Graduate Placement Report: Viterbo University

Class of 2006: Bachelor Degree Graduates

(December 2005, May 2006, and July 2006 Graduates)

Questions about the report may be directed to the Career Services Office
Beth Dolder-Zieke, Director
Anne Ellefson, Career Specialist
608-796-3828

The placement rate for the class of 2006 is 98%.

This placement percentage includes 2006 graduates receiving a bachelor's degree and reporting that their primary activity is enrollment in graduate/professional school or other continuing education; service in a branch of the armed forces; or employment, either on a full-time or part-time basis in or out of their fields of study.

All percentages in this report are based on the total number of graduates reporting, not the total number of graduates. In addition, percentages have been rounded to the nearest whole number.

Alumni reporting they are currently not working and not seeking employment are not included in the placement tabulations.

A total of 369 students graduated in December 2005, May 2006, and July 2006. Fifteen students of those students earned double majors, making the total number of majors conferred 384.

RLST: Religious Studies	SOC: Sociology
SOWK: Social Work	SPAN: Spanish
THTR: Theatre	

Definition of Terms/Explanations of Calculations

- “Total reporting” refers to graduates about whom data was gathered from sources deemed to be reliable sources by Career Services staff members. Those sources include information obtained via forms completed by graduates, telephone calls to the graduate or his/her family members, emails from the graduate, and information from professors and other personnel who have remained in contact with the student.
- “Placed” refers to those individuals in the designated major about whom data was collected and who indicated they were employed either on a full-time or part-time basis in or out of their fields of study, enlisted in a branch of the armed forces, and/or enrolled in graduate/professional school or other continuing education.
- “Employed in field” includes individuals who report being required to complete their program/major for their current employment position or using knowledge/skills related to their program/major in their job. Graduates with double majors who are working in fields related to one of their majors are listed as “employed in field” for their respective listings in both majors. Calculations for percentages in this category consider the total number of majors employed in his or her field and the total number of majors reporting, minus those who indicated they were not seeking employment at this time.
- “Employed out of field” includes individuals who report working in a position that does not require a bachelor’s degree or a position that does not use the skills/knowledge they gained from their program or major. Calculations for percentages in this category consider the total number of majors who report being employed outside his or her field and the total number of majors reporting, minus those who indicated they were not employed and not seeking employment at this time.
- “Graduate/professional school” includes individuals who report that their primary activity is attending a graduate or professional program. Percentage calculations are based on the number of majors reporting, excluding those who indicated they were not seeking employment at this time.
- “Continuing education” includes individuals who report their primary activity is furthering their educations at a non-graduate level. Percentage calculations are based on the number of majors reporting, minus those who indicated they were not seeking employment at this time.
- “Military” includes individuals who report their primary activity is in a branch of the armed forces. These individuals are counted as employed in field. Percentage calculations are based on the number of majors reporting, minus those who indicated they were not seeking employment at this time.
- “Available” includes graduates who report they are not employed and are actively seeking employment. Percentage calculations are based on the number of majors who reported and indicated they were seeking employment and the total number of majors who reported, excluding those not working/not seeking employment at this time.
- “Not seeking” includes people who report they are not a part of the work force, not continuing education, and not seeking employment at this time.
- “No report” indicates no information was obtained about a graduate.

2006 PLACEMENT REPORT: VITERBO UNIVERSITY
