Sectional drawing shown with approximate angle needed to a full Front Wash. Due to building architecture, it is necessary to flip the destinations for 1st & 2nd Catwalks. DS Wash from 1st Beam, MS Wash from 2nd Beam, and US Wash filled out with units from the LX 1.

Also shown in a hatched out box is the orchestra pit which can play at stage, audience or orchestra level. In this drawing it is at stage level.

Paper Size: Oversize ANSI D
